---

Cari,

On September 17, 2015 Letters were sent to neighboring property owner on the list provided by City staff notifying them of the November 3 P&Z meeting as well as the open we held on October 5<sup>th</sup>.

Responses were as follows:

Harold Amsbaugh emailed asking if we could move the P&Z meeting date as he was out of town.

We responded that it was not possible as the date had been noticed and was not flexible.

Al Felisione our neighbor to the east in control of the "Old Sedona Bar and Grill" property, called offering his support saying "Let me know if there is anything I can do"

We thanked him for his support.

We held an open house at Thai Spices Restaurant on October 5<sup>th</sup>.

Micheal McMillen our new neighbor to the west representing "The Melting Point" was the only one in attendance.

We discussed aspects of the project, showed renderings and explained aspects of the site plan, and how it will look. We discussed the drain from his parking lot and the property corner. He said we were welcome to come on his

property if needed to construct the drain system. We discussed the back of his parking area as it meets us, and he expressed that would work out well. He expressed support and cooperation and a win-win relationship into the

future. We plan to get together at the site and discuss more in detail.

"When are we going to get it started" is the biggest question with most of the people at large. Many are confused and surprised by the fact that we are having to go through the process all over again. No one has expressed

opposition or that we should do it differently.

Thank You  
Pearl Pardee
