\$ FY25 Project Design Budget: \$42,000

In response to numerous complaints about pedestrian and cyclist difficulties in and around Dry Creek Road near SR 89A, the Public Works Department is suggesting a traffic calming project to improve the positioning of crosswalks in the area and adding a speed table just south of White Bear Road. Pedestrian and cyclist safety and convenience will be enhanced by connecting the existing 10-foot wide shared-use pathway from White Bear Road to Pinion Drive. These new pathways will traverse along the south edge of SR 89A and the west side of Dry Creek Road.

Consideration will be given to the closing of the eastern pedestrian crossing of SR 89A at Dry Creek Road, thereby enabling a rephasing of the signal at this intersection to allow more green time to motor vehicles.

Design is progressing and ADOT is considering the proposed changes at the intersection with SR 89A
