Sedona in Motion 5D – Ranger Road / Brewer Road RAB Intersection Improvements FY25 CIP Update

This project has been identified as a need for many years; and is now being prioritized to assist with the alleviation of traffic congestion in the local area and in the SR89A roundabout.

The new roundabout intersection will include constructing a portion of a Ranger Road extension and will also look to accommodate the connection from Portal Lane to Brewer Road as part of SIM-5A.

Status:

The design phase is complete. The requirement of an 18-foot high retaining wall is being eliminated by the acquisition of additional land area (currently being completed).

Hydrologic flood modeling analysis of Soldier Wash has shown that the existing arch bridge in this area can be salvaged and extended, while resulting in a “NO rise” to the floodplain. Nevertheless, FEMA permitting is obtained.

The proposed Portal Lane to Brewer Road design is being designed separately as another SIM project (SIM 5A) to start in FY25. It is shown above as a concept only.

The extension of the Ranger Road leg of this roundabout to connect to SR89A has been designed as an interim connection. Depending on Grant application success, this may be added to the construction contract for this SIM 5D roundabout. Some final land acquisition tasks are also in process.

KEY FEATURES:

Consultant: Kimley-Horn

Contractor: TBD

Timing: FY22 – FY26

Construction Challenges:

- Adjacent driveways
- Limited footprint
- Proximity to Soldier Wash
- Public access to Brewer Road

Project Manager:

John Hall, PE
